FIRST ASSISTANT SECRETARY
8 DEC 1954
AGRI. DEVELOPMENT

Sir,

Sub: Buildings - South Kanara district - Veterinary Hospital, Mangalore - Sinking of a well - Proposals.

Ref: Government Agriculture Department Memorandum No.133661-CI/54-1, dated 19-11-1954.

Government, in paragraph 3 of their Memorandum No.87734-E/53-1, Development Department, dated 27-7-1953 ordered that the proposal for sinking a well in the compound of the Veterinary Hospital, Mangalore may be renewed in 1954-55 furnishin full information on the results obtained in the matter of supply of water by the provision of an additional pump and repairs to the existing pump in the Warders line in the Sub Jail at Mangalore. I am accordingly renewing the proposal for favourable consideration of Government on the following grounds.

2. The District Veterinary Officer, South Kanara, Mangalore has reported that in spite of the repairs to the old pump and the provision of an additional pump in the Warders line in the Sub Jail, Mangalore, there was no improvement in the water supply to the Veterinary Hospital, Mangalore from the Sub Jail, Mangalore The District Veterinary Officer has also pointed out that it is not due to any defect in the distribution system nor any unwillingness on the part of the Jail authorities to supply water to the Veterinary Hospital, but it is a question of availability of sufficient water in the wells of the Sub Jail, because during summer months, there is generally water scarcity in Mangalore and especially in th well of the Sub Jail, Mangalore which is situated on an elevated place. During summer, the wells in the Sub Jail compound have little or no water.. The District Veterinary Officer has also reported that during the year 1953-54, there was absolutely no water in the taps from 31-12-1953 to 22-1-1954, 9-2-1954 to 16-2-1954 and 13-3-1954 to 7-4-1954. Even during days when there is flow of water in the taps, the supply is reported to be quite insufficient for the needs of the Veterinary Hospital, the valuable livestock stationed there and the occupants of quarters attached to the Veterinary Hospital. It is therefore essential that a separate well for the use of the Veterinary Hospital, Mangalore and the occupants of the Government quarters attached to the Veterinary Hospital be provided immediate in the interests of the working of the Hospital and the occupants of the Government quarters attached to it, to ensure independent and sufficient supply of water, as already explained in this Office letter Roc.No.9505-II/52, dated 20-8-1952. In this connection kind attention is invited to letter No.1363 /W2/52, dated 11-12-1952 of the Inspector General of Prisions, Madras in reply to Government Development Department Memorandum No.97911-E/52-3, dated 10-10-1952, wherein the Inspector General of Prisons, Madras has also explained the imperative need for the provision of a separate well for the use of the Veterinary Hospital, Mangalore and the staff.

3. Accordingly I forward herewith a revised plan and estimate amounting to Rs. 7,600/- (Rupees seven thousand six hundred only), obtained from the Executive Engineer, South Kanara Division, Mangalore, for sinking a well in the compound of the Veterinary Hospital, Mangalore. I request that Government may be pleased to accord their approval for the work and sanction the expenditure of Rs. 7,600/- (Rupees seven thousand six hundred only) at an early date.

4. The expenditure is debitable to '50.a. Civil Works, original works - Buildings - Excluding postwar reconstruction - I. ordinary areas - O.Veterinary Minor Works'.

Yours faithfully,

Enc:

Memo No. 133661/CI/54-3 D 19.1.55

Sub: Buildings - SK Dt - Veterinary Hospital, Mangalore - Sinking of a well - Proposals.

Ref: From the DAH dr No. 4980-II-2/54 D 3/12/54

With ref to the proposals submitted with his letter read above it has been suggested that if the existing well in the B.T. School is near enough to the Veterinary Hospital, Mangalore it might be possible to get water from it. As an alternative it has also been suggested

P.T.O.

2-3

to have a bore-well at a lesser cost in the same site where the open well is proposed to be sunk. The DAH is requested to offer his remarks very urgently on the feasibility of the above two suggestions.

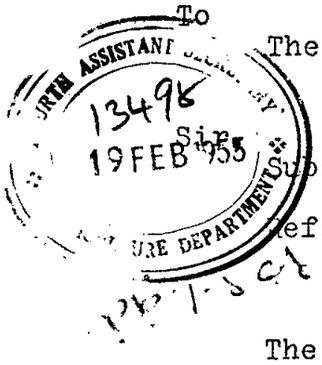
Roc.No. 4980-II-2/54. Animal Husbandry Department,
Triplicane post, Madras,
Dated 15-2-55.

From

Sri.V.R.Rajagopalan, GMVC.Dip.Bact.(Manchester)
Director of Animal Husbandry, Madras.

To

The Deputy Secretary to Government,
Agriculture Department, Madras.



Sir,

Sub: Buildings - South Kanara district - Veterinary Hospital, Mangalore - Sinking of a well - proposals -
Ref: Government Agriculture department Memo.No. 13366-CI/54-3 dated 19-1-55.

-o-

The District Veterinary Officer South Kanara has reported that the Basic Training school adjacent to the Veterinary Hospital, Mangalore is a residential institution with a hostel attached to it having 132 in-mates. In addition to the in-mates, there are 162 pupils studying in the school. During summer months - from January to May - the water in the well of this school is reported to be quite inadequate even to meet the normal requirements of the school and the Hostel attached to it. As such and also based on past experience, it is not worthwhile to consider the question of getting water from the well in the Basic Training school for the use of the Veterinary Hospital and the occupants of the quarters attached to it.

2. At present there are 6 breeding bulls stationed in the Veterinary Hospital, Mangalore, which includes two bulls intended for the Artificial Insemination centre under the Community Project. The daily requirements of water for the Veterinary Hospital purposes, the bulls and the families of the staff in occupation of the quarters attached to it, is reported to be about 900,gallons. The District Veterinary Officer South Kanara considers that it is practically impossible, to get such a large quantity of water from the neighbouring wells and much less during the summer season when there will be little or no water in the wells.

3. As regards the provision of a deep bore well in the Veterinary Hospital, Mangalore at a lesser cost, a reference is invited to this office letter Roc.No.2886-II/53 dated 6-7-53 wherein it has been already explained that provision of a deep bore well in the Veterinary Hospital, Mangalore is not feasible. In their Memo.No. 87734-E/53-1, Development department dated 27-7-53, Government accordingly agreed that the proposal for providing a deep bore well in the Veterinary Hospital Mangalore be dropped and directed that the proposal for sinking an open well may be renewed after watching the results effected in the matter of supply of water by the provision of an additional pump and repairs to the existing pump in the Warders line in the sub jail at Mangalore. The proposal to sink an open well in the Veterinary Hospital, Mangalore was accordingly renewed in this office letter Roc. No. 4980-II-2/54 dated 3-12-54.

4. In view of what has been stated above, a separate open well for the use of the Veterinary Hospital, Mangalore and the occupants of the Government quarters attached to the Veterinary Hospital is necessary and has to be provided as early as possible.

5. I, therefore, request that the Government may be pleased to accord their approval to sink an open well in the Veterinary Hospital, Mangalore and also sanction an expenditure not exceeding Rs. 7,600/- (Rupees Seven thousand six hundred only) for the work, as already requested for in this office letter Roc.No. 4980-II-2/54 dated

pto.....

16

3-12-54. As soon as the Government orders are received, the Chief Engineer, Public Works Department will be addressed to provide the necessary funds for executing the work during the current year as a special case.

Yours faithfully,

for Director of Animal Husbandry Madras.

Sub: Buildings - South Kanara Dt - Veterinary Hospital, Mangalore - Sinking of a well - Proposals.

Ref: From the DAH. Sr. No. 498.0-II-2/04 dt 3/12/04.

The proposals of the DAH. in ps of may be perused.

2) In August 1952 the DAH. submitted proposals for the sinking of an open well at an estimated cost of Rs 8650/- for in the Veterinary Hospital premises at Mangalore, as the supply of water that was being received from the Sub-Jail was not satisfactory. As it was reported that some improvements were being made to the water-supply system of the Sub-Jail to ensure better supply, the proposals were deferred and the DAH was asked to renew the proposals after watching the result of the improvements made in the Sub-Jail. In that connection then the Minister for Agriculture wanted to renew find out ~~what a deep bore well would cost~~ and also whether it would not be preferable to sink a bore well instead of an open well.

3) While communicating the decision of Govt to defer the proposal for the sinking of a well, the DAH was asked to find out the cost of sinking a deep bore well and also whether a borewell would not be preferable. With ref to above the DAH stated that

6" to 4" trial boring to a depth of 125 feet would cost about Rs 2750/= as estimated by the Assistant Industrial Engineer, Coimbatore, and that in addition, ~~a sum~~ an expenditure of Rs 410/= would ~~be required to be incurred on the~~ purchase ~~cost~~ of a deep well pump set. It was also reported by him that the proposal for a boring well at a cost of Rs 2750/= for the Veterinary Hospital at Mangalore was considered in 1950 ~~and~~ but was given up following the alternative arrangement ~~to be made by providing~~ of a pipe line connection from the Sub-jail. The D A H also furnished out that trial borings were made in the compound of the staff quarters in 1942 to excavate an open well and that the boring had to be given up because of rocks and as water ~~was~~ could not be tapped. In view of the above circumstances the proposal for providing a deep bore well for the Veterinary Hospital at Mangalore was ~~dropped~~ dropped.

4) The D A H. who was requested to furnish full information on the results obtained in the matter of supply of water by the provision of an additional pump and repairs to the existing pump in the Warder's line at the Subsy jail at Mangalore has since furnished a report at ps of which may be perused. It is

133661 C/54

having been effected

reported that in spite of the repairs to the old pumps and the installation of an additional pump in the Sub-Jail, there has been no improvement in the water supply to the Veterinary Hospital, Mangalore. The D A H therefore considers ~~it essential~~ that a separate well is necessary for the use of the Veterinary Hospital, Mangalore and the occupants of the Court quarters attached to it. ~~should be provided immediately to ensure independent and sufficient supply of water~~. He has forwarded a revised plan and estimate amounting to Rs 7,600/- obtained from the Executive Engineer, South Kanara Division, Mangalore, for sinking a well in the compound of the Veterinary Hospital, Mangalore. For orders whether the proposals of the D A H will be accepted in this Dept. Home, PWD & Fin Depts may see for remarks.

15.12.54

In the circumstances stated at A in para 2 of the p 5 C.S. the proposal of the D.H. to construct an open well in the Compound of the Vety Hospital, Mangalore may be ~~approved~~ supported

PW. (C.)

Notes from p.1 ante may be perused. In view of the prevailing financial stringency and the high cost of labour and material the present policy of Govt is to accord sanction only to such schemes as are immediately and unquestionably essential for carrying on the administration. From the reasons set out at A in p.5 C/F there seems to be justification for the sinking of the proposed well. ~~But there is no information as to the steps~~ ~~taken by Govt to see that~~. It is also stated in the report accompanying the estimate that a proper site has been chosen and no difficulty is anticipated in getting water at the site. Hence the amount to be spent on the work is not likely to become unprofitable. The proposal may be agreed to in this light subject to steps being taken including those at (a). With these remarks the case may be passed on to Finance.

24/12/54 23/12/54 24.12.54

(63)

It appears that difficulty is experienced every during the summer months. It is also reported that during this period there is generally water scarcity in Mangalore and especially in this locality which appears to be an elevated place. The cost of the proposed open well is rather heavy and it is also doubtful whether it will solve the problem. If an existing well in the BT school is near enough and it might be possible to get water from it. If this is not practicable the feasibility of having a borewell at a lesser cost in the same site where the open well is proposed to be sunk might also be considered.

The notes at pp 1-3 ante explains the case. With reference to the notes of D.S. P.W.D. on p 5 ante, please see the letter from the D.A.H. on pp 9-10 Cs. For the reasons stated in paras 1 and 2 on p 9 Cs, the District Veterinary Officer, South Kanara is reported to be of the view that it is practically impossible to get required quantity of water from the neighbouring wells.

As regards the ~~provision~~ suggestion for the provision of deep bore well in the Veterinary Hospital, Mangalore he has ~~directed~~ the attention of the Govt. to his previous letter at p 13 Cs. of R. wherein he had already explained that provision of a deep bore well in the Hospital is not feasible. The D.A.H. has therefore ~~reiterated his old~~ requested the Govt. to accord ~~sanction~~ their approval to sink an open well in the V. Hospital and also sanctions an expenditure of Rs.7,600/- for the work as already requested by him in his letter at p 5 Cs.

P.W.D. and Fin may see.

AGRICULTURE(C.I)DEPT.

SUMMARY

This file relates to the question of sinking an open well in the Vety. Hospital, Mangalore, at a cost of Rs.7,600/-

2. In August 1952, the D.A.H. submitted proposals for sinking an open well at an estimated cost of Rs.8650/- in the Veterinary Hospital premises at Mangalore, as the supply of water that was being received from the Sub-Jail was not satisfactory. As it was reported that some improvements were being made to the water-supply system of the Sub-Jail to ensure better supply, the proposals were deferred and the D.A.H. was asked to renew the proposals after watching the result of the improvements made in the Sub-Jail. In that connection, the then Minister for Agriculture wanted to know the cost of sinking a deep bore well and also whether it would not be preferable to sink a bore well instead of an open well.

3. While communicating the decision of Govt. to defer the proposal for the sinking of a well, the D.A.H. was asked to find out the cost of sinking a deep bore well and also to state whether a borewell would not be preferable. With ref. to above, the D.A.H. stated that 6" to 4" trial boring to a depth of 125 feet would cost about Rs.2750/- as estimated by the Assistant Industrial Engineer, Coimbatore, and that in addition, an expenditure of Rs.410/- would have to be incurred on the purchase of a deep-well pump-set. It was also reported by him that the proposal for a boring well at a cost of Rs.2750/- for the Veterinary Hospital at Mangalore was considered in 1950 but was given up, following the alternative arrangement to be made by providing pipe line connection from the Sub-Jail. The D.A.H. also pointed out that trial borings were made in the compound of the staff quarters in 1942 to excavate an open well and that the boring had to be given up because of rocks and as water could not be tapped. In view of the above circumstances the proposal for providing a deep bore well for

the Veterinary Hospital at Mangalore was dropped.

4. The D.A.H. who was requested to furnish full information on the results obtained in the matter of supply of water by the provision of an additional pump and repairs to the existing pump in the Warder's line at the Sub-Jail at Mangalore has since furnished a report at p.5 c.f. which may be perused. It is reported that in spite of repairs having been effected to the old pump and of the installation of an additional pump in the Sub-Jail, there has been no improvement in the water-supply to the Veterinary Hospital, Mangalore. The D.A.H. therefore considers that a separate well is necessary for the use of the Veterinary Hospital, Mangalore and the occupants of the Govt. quarters attached to it. He has forwarded a revised plan and estimate amounting to Rs.7,600/- obtained from the Executive Engineer, South Kanara Division, Mangalore, for sinking a well in the compound of the Veterinary Hospital, Mangalore.

5. At the suggestion of the P.W., it has been ascertained from the D.A.H. that it will not be possible to use the well in Basic Training School nearby, as during the summer the water in the well goes down and is not adequate to meet the requirements of the inmates of the school itself. In the circumstances, he has requested sanction for sinking an open well at a cost of Rs.7600/- P.W. and Fin. have accepted the proposal of the D.A.H. As the expenditure on the work is debitable to "50.Civil Works", ~~Rev.~~ P.W. have suggested circulation to M(W) also. Fin have also suggested circulation to M(F+E).

It is for orders whether the proposal of the D.A.H. for sinking a well at the Vety. Hospital Mangalore at a cost of Rs.7600/- will be approved.
